```java
class Human {
        private String name;
        private int age;

        public Human(String name, int age) {
                super();
                this.name = name;
                this.age = age;
        }

        public String getName() {
                return name;
        }

        public void setName(String name) {
                this.name = name;
        }

        public int getAge() {
                return age;
        }

        public void setAge(int age) {
                this.age = age;
        }

        @Override
        public String toString() {
                return "이름: " + name + ", 나이: " + age;
        }

}
```
